

Hi! I'm

My major

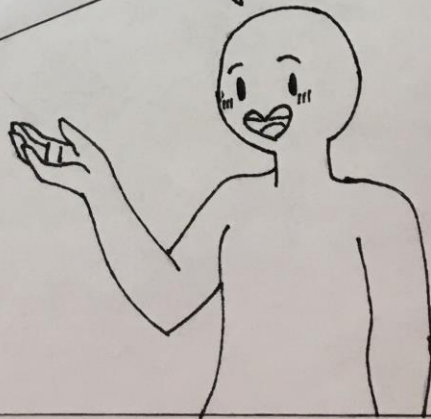

is

with a minor
in
Scientific + Technical
Communication!
(Technical Writing)

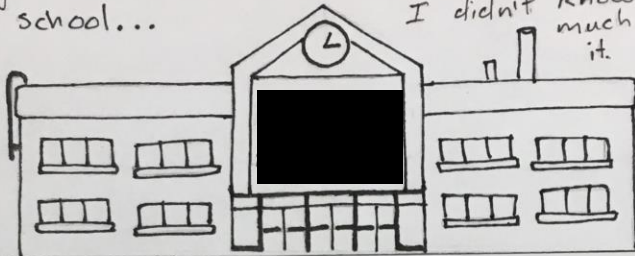

◇COMPUTER SCIENCE◇

HERE'S
how I got to where I
am now

Starting in high school...

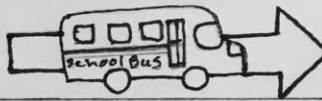

I wasn't interested in computer Science and I didn't know much about it.

Here is the trade school option I found out about a bit too late.

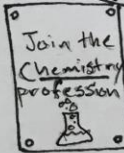

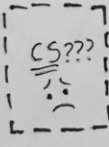

High school

Trade school

Didn't really help that CS wasn't largely advertised.

But! I did manage to find + take a HTML class!!

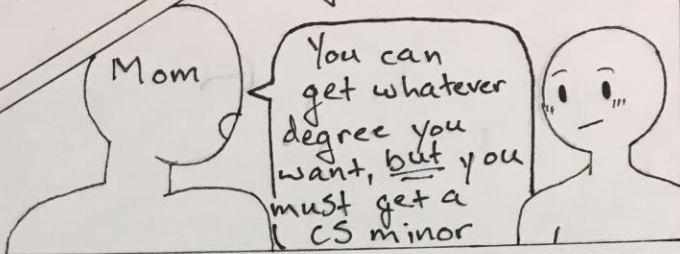

HTML & CSS
Introduction class

Next: Cottey College

Freshman +
Sophomore
Year

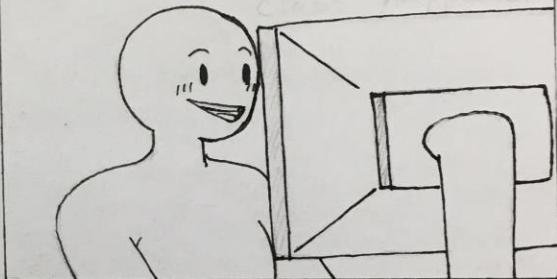

Before going I
was given an ultimatum:

Original plan was
for a:

Graphic
Design
Degree

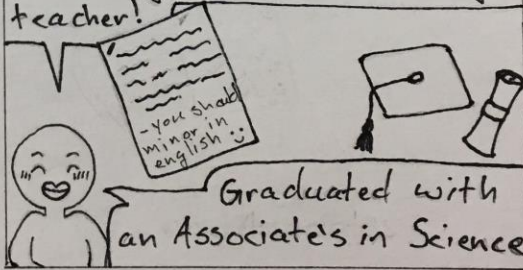

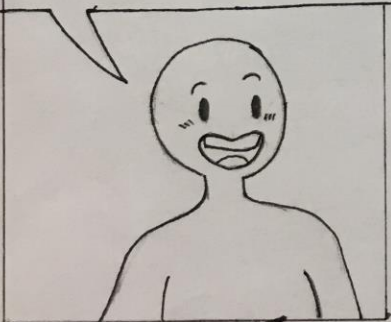

But then...

That lead me to
changing my
major to computer science.

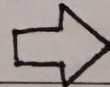

My first programming class
happened!

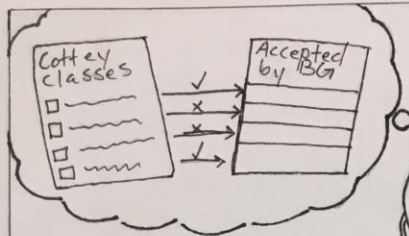

Not to mention I got
into my minor because of
encouragement from my english
teacher!

Graduated with
an Associate's in Science

Onto my time at Bowling
Green and the current time!

Not all credits transferred so I had to fill out some BGPs

And because the new CS classes were in C++ and I had been using Java, I audited the first level class at BG.

Languages Known
 Java C++

It all worked out 'cause I'm still in the major!

-*

As for my minor, Scientific & Technical Communication (Technical Writing), I've continued good communication with those in charge of it in the English Dept.

Still on track for it!!

All in all, I'm glad I've ended up where I am now discipline-wise.

Thanks for Listening!

★ THE END!
