- Helped when I needed it
- I got the time to ask personal questions about my grade.
- I feel like the one-on-one time was unnecessary but it was beneficial. But other students may like one-on-one time more than I do.

9 - Please comment on the strengths and weaknesses of the course. What changes would you suggest for the course and/or the instructor?

- I think it was all great.
- There was no use to meeting in class because everything was done online and nothing was taught. I suggest that the papers should be hand graded so that you get good feedback.
- I feel the grading was unfair and I failed a lot of papers I should not have because of the pass/fail system
- The strengths of this course that there were a lot of different kinds of projects. Meaning we got to learn more about each thing. The only change I could would be the time of the class but I enjoyed this class.
- Class was a great success! Instructor kept our projects on track and was open to any questions on the project. There really wouldn't be any changes I would make to the course because the class was kept interesting and kept the students actively engaged. Instructor kept students on track with project due dates and kept students informed on changes when necessary.
- I feel like this course was mostly a review from high school and was just writing a bunch of papers; but not everyone has the same high school experience. I learned a few things throughout this course which was beneficial.
- I have heard stories about the wraith-like, eldritch creature that is (supposedly) GSW. This class was not like what I heard, Mrs. LaFollette was a great professor and I think she was overall fantastic!
